Based on an idea by User:Guest, Vex takes place in a world that has experienced a great civil war, leaving society in a total state of chaos. As the player, you play as Jose, an outcast who lives in the outskirts of society, a place inhabited by monsters and criminals. Although your home is poor, the player's destiny lies ahead as you embark on a journey to deliver a message you received from an old friend.

**Features**

**Simple Rules:** The game follows a very simple rule system with very basic rules and mechanics that allows you to create whatever game you can imagine!

**Easy to Learn & Master:** Every rule in the game makes it easy to learn and master which allows you to play any type of game you can imagine.

**Multiple Game Modes:** There are multiple game modes you can play, such as a free running, turn-based story, combat and AI battles, and plenty of custom games you can make.

**Beautiful & Nifty World:** The world of Vex is pretty unique, filled with dinosaurs and cavemen, you'll even come across the weirdest creations that you can imagine!

**From the developer:** I have had a passion for video games since I was a child. At first it was action games like Street Fighter II or Duke Nukem, then it was the classics like Pacman and Super Mario. However, it wasn't until the early 2000s that I discovered the RPG genre with Final Fantasy and The Legend of Zelda. Because of those games, I wanted to create my own game, but I found it very difficult to find anything on the market. So I decided to take my love for games and create a game by myself. Because of that, I named the game Vex.

**Q&A**

**Q:** Is the game you made in the 1980s? **A:** Absolutely not! Vex was born in 2009 and is made in the fashion of today.

**Q:** The idea of monsters and monsters is a pretty old concept. Was this something you knew when you were making Vex? **A:** No, Vex is based on the idea of a world where humans have a population of less than 10,000 people. What if we lived in a world where an outbreak of some unknown virus happened at an unknown time in the past, and things got pretty bad.

**Q:** Will you be releasing any more games that are similar to Vex

## **What's new in Equilibrium:**

**I realized recently I've been caught out out here alone. Generally, the older people try and warn us in advance not to wander too far from the campsite. And though in relatively recent history (1986) campers have been held accountable for two deaths, it doesn't seem to be a safety issue at all. Nearly everyone warns us out of our sight not to leave our campsites for fear of disturbing bears. But it seems they're wrong. If it's late in the day, packing up camp and riding off to explore areas only a few hundred meters away from a complete site of campers, is likely to prove unwise. You simply don't know what you're up against. Many animals have been reported as being far more active in the wee hours of the night than people usually like to believe. Bears, large and small, salamander and raccoon. Wolves, too. And while we're talking about predators, bear pens, chicken coops (no, we're not talking about running three chickens off through the woods), trash, etc, are all right out there in plain sight. Despite the warnings, there are times the temptation to explore exceeds the gatherer's control. Alaska is abundant in park areas and public lands. The forest is an open canvas of pristine land in most areas. However, large masses of people have created prime habitat for grizzly bears to hide out in, like the Denali National Park and Preserve. In Denali there are now so many bears living in that area the Park Service doesn't let people hike past a certain point to view them from a distance because it's "too dangerous." They have to end any viewing by 2:00 PM or you won't be allowed to go back. As a result of grizzlies moving in and out of nearby areas, the average time spent by den seekers is only about 14 minutes. That translates into only 13 trips closer to the bears. Thus, casual observation is virtually impossible. There are other areas of the parks with large populations of bears that wildlife managers don't want people to get any closer. In Glacier, that's probably about anywhere off trail from the campground. Even though they issue daily bear warnings, you've still**

## **Free Equilibrium [Win/Mac]**

Realistic Flight and Game Mechanics: Flight mechanics have been reworked to be much more realistic. Game physics have been tuned to help players feel like a powerful predator. Fine Grained Hunting: Hunter can now hunt in a fine grained way. Hunter can choose to prioritize prey for meat or for feathers to collect, and adjust hunting strategies to reach that goal. Hunt the usual hares, but also hunt flying prey, or pick off small chukars and even in awkward poses. Fantastic Creatures: Fly the majestic American Eagle, grow wings of a Phoenix, glide through the grass and hunt rabbits like a Prairie Falcon. Hunt seals and turtles in an ice bay or a snowy mountain forest. Scoring System: Unique to Freedom, the hunter is scored for the % of live prey collected. Kill a rabbit and you'll get a small reward. Catch a small chukar, and you'll see a big reward. Pick up flying prey, and you'll see a large reward, and so on. Obedience: The eagle in Freedom will never be alone. All other eyes, no matter what size, can move towards your eaglet at any time. Hunters can be alerted by smaller eyes as well, like those of prey. Feather Collecting: The eaglet leaves a trail of feathers in its wake for hunters to follow. Hunters can collect the feathers for an even bigger reward. Replayability: Hunters can replay the game with personalized settings that better fit their needs. Rely on their time and earnings, or use the star points (earned by hunting) to upgrade equipment. Fitness: The eaglet is the ultimate predator, developed to be fit for long hunting expeditions. Staying out of the sun will increase his stamina, and will grant him the ability to hunt in much longer sessions. Fight Back: How about a little self defense? You've earned the bird's trust, your attacks cause significant damage to eagles. Control: If your eagle is injured or cannot fly, you can control the camera as well as direct the eagle to land on you and head home. Playable eagles: Each eagle comes with a rich history and a unique personality. You can see how they were raised, how they were captured, and how they are tracked and flown. Greatest Eagle & Eagle a la Carte: You can play as the greatest eagle in the West (the golden eagle) or the greatest eagle in the East (the bald eagle)
