More about Gravity Chase: developer and game designer Duo Thong has created a futuristic game that combines anti-gravity racing with a unique track design. The game combines a futuristic arcade racing experience with a survival gameplay concept and a modern match-3 gameplay format. A major difference from almost all other racing games is that Gravity Chase is played on a track that will follow the players on all sides of the ship. This makes for an anti-gravity racer that allows for extremely fast games with tactical play. Each player has a slight tactical advantage to counteract the multi-directional tilt. The game is designed for 2 to 4 players in local split-screen multiplayer using touchscreens and the free included split-screen controller. Alternatively, the game can be played on a single device with a Bluetooth controller. Playing by yourself requires the use of the gamepad or touchscreen controller. The game can also be played in online modes against other players via dedicated servers. Toffee offers Gravity Chase for free and the multiplayer option is included in every game. The offline and single player modes can be enjoyed at no cost.
