He also has a couple of ebooks on press including a couple of thing from the TTA at White Fang Press. We've been following his adventure for a while now with good measure. If you click on the featured author you'll get a quick preview of the video from their personal site but the video is yours to view for FREE at their YouTube Channel. WHITE FANG PRG Vee would have given birth and the baby would have been called: White Fang Featured Author Affiliation Erotic Romances, Blood and Serenity Publishing Titles WHITE FANG PRG She is a steampunk steampunk villain turned sort of heroine. Sometime in the future there are no more heroes. They are all dead. Our hero is the same. The last resort of the law. He's like an ex-cop in the mean streets of the future. Good thing he has two lethal weapons. A sabre and a gun. Book 1: The Liberty Police Book 2: The Liberty Police: Amoeba (It's illegal to protect you) Book 3: The Liberty Police: Hero's Choice (What will he sacrifice for Liberty?) Book 4: The Liberty Police: Sweet Treats (What will he sacrifice for Freedom?) BOOK 5: The Liberty Police: The Last Me (Things go bad) Book 6: The Liberty Police: Sweet Cheat (The legacy of a hero) Book 7: The Liberty Police: Phantom Heros (The last life, the worst death) Book 8: The Liberty Police:

A: I just did this today, and I thought I'd share what I did. Also I'm going to change the title of the thread to include the segment-size so that it's easier to find this, and future, questions.

The key is the use of the StructAppend function (It allows you to append a value to a fixed-size string, called a chunk. I used StructAppend to dump the MD5 checksum of an 8-segment-per-character display string, in 64 bytes, to a memory buffer. The code I wrote looks something like this (pretty sloppy, but gives the idea): ' Find the correct offset into the buffer to append to. Dim strPositionToAppendTo as Long'Align the end of the buffer with the end of the segment string. strPositionToAppendTo = 162 ' Get the end of the segment string. Dim strSegmentSize as Long'Dividing by this gives the position in the buffer to append to. strSegmentSize = 8 ' Get the size of the buffer in bytes. Dim strSegmentSizeNumBytes as Long strSegmentSizeNumBytes = (strSegmentSize - 1) * 64'8-segment string

times 64 chars. ' Copy into the buffer, starting at the correct position. StructAppend strBuffer, chr((strSegmentSize - 1) * 64 + strPositionToAppendTo) ' Use the buffer to compute the MD5 hash. Dim strMD5Hash As String strMD5Hash =

UCase(StructToString(strBuffer)) I put this code in a subroutine. The end result was that I was able to get the MD5 checksum of a 64-byte string in the buffer, in about 0.3 seconds.

That's what I think the question is about. Old Post Road Corridor Open House

BUILD.MAKE.RIDE. Old Post Road Corridor Open House - June 2018 In October, 2017, the Department of Transportation announced its intent to acquire the portion of New York State Route 59 and New York State Route 59A that are adjacent to US 9W. The DOT stated that they would be willing to
